## EDUCATION

|                                                                           |              |
|---------------------------------------------------------------------------|--------------|
| Bachelors of Technology, 2027 Batch, Manipal University Jaipur            | CGPA: 8.54   |
| Senior Secondary Education, 2023 Batch, Venkateshwar International School | Grade: 88%   |
| Secondary Education, Venkateshwar International School                    | Grade: 91.5% |

## SKILLS

**Languages:** Python, C, C++, Java, JavaScript, TypeScript, HTML, CSS  
**Frameworks & Libraries:** Express, Node.js, TensorFlow, PyTorch, Numpy, Pandas  
**AI/ML:** LLMs, RAG, YOLO, CNN, RNN, Llama, Generative AI, Azure AI  
**Tools & Technologies:** Git, VS Code, Azure, Streamlit

## WORK EXPERIENCE

**Project Intern, Bik.ai, Delhi** May 2024 – August 2024

- Led the design and deployment of an LLM-based induction platform using Retrieval-Augmented Generation (RAG) and AI agents.
- Automated and streamlined the employee onboarding process with intelligent, company-specific training workflows.

**Technical Secretary, IEEE Computer Society, MUJ** May 2025 – Present

- Held the highest technical leadership position in the chapter, overseeing all projects and technical aspects of major events.
- Directed multiple cross-functional project teams, reviewed architectures, and ensured timely, high-quality deliveries.
- Mentored members in AI/ML, cloud systems, and advanced software engineering practices.

**AI Intern, MKS** May 2025 – Present

- Serving as **Technical Lead** for **MKS DocAI** — a secure, enterprise-grade intelligent document processing platform — while in an AI Intern role.
- Designed and implemented the full backend architecture, enabling bulk ingestion, schema-based field extraction, real-time validation, and secure data storage.
- Integrated **Microsoft Authentication Library (MSAL)** for secure enterprise authentication and **Microsoft Graph API** for document repository access and Azure Active Directory integration.
- Developed the **Admin Dashboard** for schema creation, user role management, and audit logging, and the **Validation Interface** for side-by-side document review and data correction.
- Optimized performance by parallelizing extraction jobs, implementing asynchronous processing, and reducing Graph API latency to support high-volume enterprise workloads.
- Coordinated with product, design, and QA teams to deliver end-to-end workflow improvements from document upload to final approval.
- Implemented enterprise-grade security protocols including encryption-at-rest, HTTPS-based API communication, and role-based access controls.
- Spearheaded architectural decisions, technical planning, and code reviews to ensure scalability, maintainability, and long-term product success.

## KEY PROJECTS

### CareMate - Healthcare Management System

- Designed an innovative solution for OPD queuing, bed availability, and patient admission management.
- Developed a therapy assistant using LLaMA 3.1 and RAG, trained on 1.5M+ patient-doctor conversations for auto-generated therapy reports.
- Built a medical chatbot capable of disease detection and appointment scheduling with integrated medical knowledge base and function calling.
- Deployed multiple disease prediction models using YOLOv10, VGG19, and SVM for real-time diagnosis.
- Created React Native dashboards with MongoDB integration for hospital, doctor, and patient interfaces.
- Streamlined Third-Party Administrator (TPA) processes by automating insurance claim generation with LLaMA 3.1.
- **Patent Pending:** Co-inventor of the CareMate system along with Professor Dr. Sandeep Chaurasia.

**MKS DocAI - Intelligent Document Processing Platform** An enterprise-grade AI-powered platform designed to securely extract structured data from unstructured documents using schema-based field definitions.

- Served as **Technical Lead** while in an AI Intern role, leading end-to-end development of MKS DocAI for a multinational company.
- Designed a secure, scalable architecture supporting bulk document ingestion, schema-based extraction, OCR for scanned files, and real-time validation.
- Integrated **Microsoft Authentication Library (MSAL)** for enterprise authentication and **Microsoft Graph API** for repository access, Azure AD integration, and role-based permissions.
- Built the **Admin Dashboard** for schema creation, user and role management, and audit logging, and the **Validation Interface** for side-by-side review and correction.
- Optimized system performance by parallelizing extraction jobs, reducing API latency, and implementing asynchronous processing for high-volume workloads.
- Implemented enterprise-level security protocols including encryption-at-rest, secure API communication, and full audit trails to ensure compliance with corporate data policies.
- Collaborated with product, design, and QA teams to deliver a seamless user workflow from document upload to validated output.

#### **AI-Powered LinkedIn Automation & Health Rank Navigator**

- Built a GPT-integrated system for automated, AI-driven LinkedIn content creation and posting.
- Developed a hospital recommendation system using WHO rankings and machine learning models for patient-centric recommendations.

#### **Minor Projects**

- **Used Mobile Price Prediction Model:** Built predictive models using ML for mobile feature optimization.
- **Health Tracking App:** Developed a health tracking application using ML to monitor user health metrics.
- **Software Quality Testing using AI:** Automated testing and quality assurance using AI algorithms.

## **ACHIEVEMENTS**

---

- **Medcro Health Hack Champion:** Led team to 1st place among nationwide participants, developing innovative healthcare solutions.
- **Accenture Innovation Challenge:** Secured top 10 position nationally, showcasing AI-driven solutions.
- **ACM Hackathon:** Won 2nd place for developing a cutting-edge technical solution.
- **AI Gen AI Hackathon:** Secured 1st place for innovative implementation of generative AI technologies.
- **BITS Pilani Postman 4.0:** Secured 2nd runner-up position; built a comprehensive healthcare platform, Care-Mate.
- **IEEE CIS AI Model Quest:** Achieved 1st place for building a university-focused chatbot using LLaMA 3.2 with RAG and finetuned models.
- **Kagglethon - IIIT Delhi:** Won 2nd place for developing an image classification model from scratch on a custom dataset.
- **InnovateNSUT 2024:** Secured 3rd position; built a GPT-powered LinkedIn automation tool.
- **World Scholar's Cup:** Participated at the Global Round in Beijing and the Tournament of Champions at Yale University.
- **Technical Excellence:** Completed certifications in Deep Learning Specialization (5 courses), Stanford Machine Learning (Coursera), Amazon Generative AI Course, and Microsoft Azure AI Fundamentals.
